

# Hey, motorists!

## Here are some tips about driving and cyclists.

- Take special care when driving near a cyclist – slow down when passing them. Be prepared for them to move without warning.
- Indicate clearly and in plenty of time when turning and stopping.
- Cycles are vehicles and have as much right to be on the road as you.
- Know your blind spots, especially when driving vans, trucks or buses, and check again for cyclists.
- Take another look at intersections. Cycles are smaller than other vehicles, and many drivers who hit them claim not to have seen them.
- Avoid overtaking a cyclist just before you turn at an intersection.
- Take care when passing cyclists on the open road. Slow down and ideally, leave at least 1.5 metres of space between you and the cyclist.
- Check rear-view mirrors and look over your shoulder before you open a car door at the road side.
- Don't insist on your right of way, even when the cyclist is in the wrong.
- Slow down and be alert when visibility is reduced. Cyclists are often hard to see, and are even more so in the rain or in low-light conditions.
